 **Help Information:**

Hits Graph

This report shows the trend of recent activity on your website in terms of successful Hits over time. The default timeframe is one week, but this can easily be changed in the Date Range control area.

Calculation Methodolgy

A 'Hit' is simply a successful request to your web server from a visitor's browser for any type of file, whether an image, HTML page, an MP3 file, or any other type. A single web page can cause many Hits -- one for each image included on the page, etc.
